PROFESSIONAL SUMMARY

Full Stack Engineer focused on architecting scalable web products, resilient backend systems, and cohesive digital experiences from concept to production.

With strong expertise across the MERN stack, Next.js, TypeScript, and relational/NoSQL databases, I design modular system architectures with clear separation of concerns—covering API design, authentication flows, state management, and structured data modeling built to grow alongside user demand.

On the frontend, I translate complex product requirements into reusable design systems and responsive, accessible interfaces. I prioritize Core Web Vitals, clean maintainable code, and automated CI/CD workflows so every release remains fast, reliable, and easy to evolve.

Whether collaborating with cross-functional teams or driving end-to-end product builds, I combine pragmatic engineering judgment with a continuous commitment to modern web standards.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	React.js, Next.js, Nuxt.js, Vue.js, Tailwind CSS, Responsive Design
Backend	Node.js, Express.js, Strapi CMS (Headless)
Database	MongoDB, PostgreSQL, MySQL.
Architecture	Design Systems, Component-Driven Architecture, Scalable App Structure, REST API Design, SSR/SSG
Tools	Git, GitHub, VS Code, npm, SourceTree, Figma

INTERNSHIP EXPERIENCE

MERN Stack Developer Intern

Dec 2025 – Aug 2026 (9 months)

JunkiesCoder App Development Company, Himmatnagar

- Built a new company website from scratch with Next.js, using server-side rendering and static generation for fast load times and SEO-optimised pages.
- Integrated Strapi as a headless CMS to manage blog posts, service listings and media through a structured REST API.
- Developed reusable, type-safe React components in TypeScript, connected to Strapi's content API for fully CMS-driven page sections.
- Implemented responsive layouts with Tailwind CSS and smooth UI animations, following a clean Git workflow with feature branches and pull requests.
- Collaborated with the design team to turn Figma mockups into pixel-perfect, accessible interfaces for desktop and mobile.

MERN Stack Developer Intern

6 months, May 2025

Xipra Technology, Himmatnagar

- Developed the full-stack Jobify website with user authentication, job listing CRUD and a candidate application flow.
- Designed and consumed RESTful APIs with Express.js, connected to MongoDB through Mongoose schemas and validation.
- Built a dynamic React.js frontend with React Router, custom hooks, Context API and responsive Tailwind CSS layouts.
- Created vanilla JavaScript mini-projects (Flippy Card Game, Stopwatch, Countdown Timer) to strengthen DOM and event-driven programming.

Web Developer Intern May 2024

UV Techsoft, Himmatnagar (Summer Internship)

- Built a Tour and Travel Management System in HTML, CSS and JavaScript covering booking flows and itinerary management.
- Implemented dynamic UI components and responsive layouts.

PROJECTS

Billing & POS System (Offline + Online)

React.js · Node.js · Express.js · MongoDB · Tailwind CSS

- Full-stack billing software with an integrated Point of Sale for in-store and online sales: fast checkout, invoice generation, inventory management and sales tracking.

Jobify

React.js · Node.js · Express.js · MongoDB · Tailwind CSS · Cloudinary

- Job board with SSR pages, typed API routes, JWT authentication and role-based access for employers and candidates.

UrbanKick

React · Tailwind CSS · Node.js · MongoDB · Express.js · JWT

- Full-stack sneaker e-commerce platform with authentication, product management, shopping cart and secure checkout.

Zoom Bites – Food Delivery App

React.js · Redux · Express.js · Socket.io · Cloudinary · Nodemailer

- Real-time food delivery app with live order tracking, file uploads via Multer and Cloudinary, and email notifications.

Music Player

React.js · Node.js · Express.js · MongoDB

- Full-stack streaming app with playlist management, playback controls and a MongoDB-backed song library.

Food Website

React · Tailwind CSS · Framer Motion · Vite

- Restaurant web app with interactive menu, cart, table reservations and fluid animations.

Andia / Portfolio Website

Next.js · TypeScript · Framer Motion

- Animated, SEO-optimised frontends with smooth page transitions, SSG pages and a project showcase.

Charity Website

Nuxt.js · Vue.js · TypeScript · Tailwind CSS · Framer Motion

- Responsive, accessible charity platform with animated sections.

EDUCATION

B.Tech – Computer Science & Design Sep 2022 – May 2025

A.D. Patel Institute of Technology, CVM University, Vallabh Vidyanagar

Diploma – Computer Engineering Aug 2019 – May 2022

Kilachand Devchand Polytechnic, Patan
